

Technical  
Information

*find your way*

Leit- und Orientierungssysteme vermitteln einen ersten - oft entscheidenden - Eindruck und sind wichtiger Ausdruck der Kundenfreundlichkeit. Abgestimmt auf die Architektur und die spezifischen Anforderungen des Gebäudes sind sie wesentlicher Bestandteil der Corporate Identity und spiegeln - hochwertig, durchdacht, konsequent in Form und Funktion - Selbstverständnis und Identität eines Unternehmens, einer Institution oder einer Behörde wider. Erst durch viele funktionale und gestalterische Details und hohe Qualitätsstandards wird aus einem Wegweiser oder Schild ein ausgereiftes Orientierungs- und Leitsystem. Bei der Entwicklung der Orientierungs- und Leitsysteme berücksichtigt moedel konsequent die hohen Anforderungen von Plännern und Kunden. In die Entwicklung und Herstellung der unterschiedlichen Systeme fließt die über 30-jährige Erfahrung in der Produktion von Siebdruckerzeugnissen ein. 90 qualifizierte Mitarbeiterinnen und Mitarbeiter erarbeiten auf 2 Werksgeländen mit insgesamt 15.000 m<sup>2</sup> nahe Amberg nach zertifizierten Fertigungsabläufen (DIN EN ISO 9001) Produkte von höchster Präzision, Perfektion und Beständigkeit.

*Information and orientation systems often provide that all-important first impression while giving vital expressions of customer-friendliness at the same time. Carefully coordinated with the architecture and the specific requirements of the building they form an essential part of corporate identity, reflecting the image and identity of the company, institution or public authority. High quality, well conceived and rigorous in both form and function. It takes great attention to functional and design details, along with high quality standards, to turn a sign or guide into an optimized information and orientation system, moedel rigorously meets the high requirements of planners and customers in the development of information and orientation systems, drawing on over 30 years of experience in the production of screen print products to develop and produce a diversity of systems. A team of 90 employees work at two factory premises (together 15.000 m<sup>2</sup>) near Amberg, where certified production processes (DIN EN ISO 9001) turn out products of the highest precision, perfection and durability.*

## Functionality of expansion fasteners

Expansion fastener

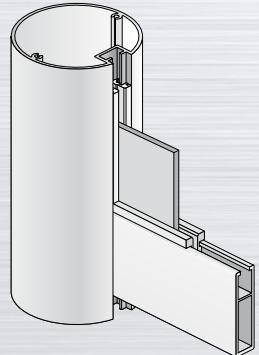

The box profiles and cross-arms are supplied with expansion fasteners for fastening to the post grooves. Position the two cavity profiles/cross-arms, which can be used on both sides, to the required position on the groove in the post and fasten by tightening the screw. Conceal the screws by fitting the screw-head covers.

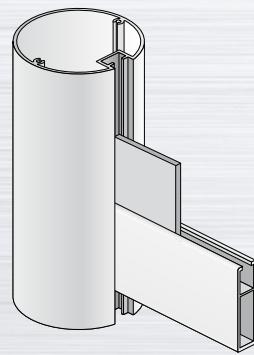

## Berlin Basic Cross bar and reducer profile

**Cross bar with 1 groove** made of aluminium, height 46 mm, material thickness of 16 mm, with 8 mm system groove.  
**Cross bar with 2 grooves** made of aluminium, height 60 mm, material thickness 16 mm, with 2 8 mm system grooves.  
 Both supplied incl. holes, expansion fasteners and screw-head covers.

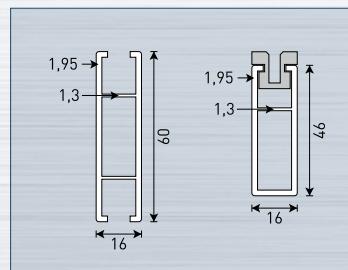

**Reducer profile for cross bar** made of aluminium, for reducing the system groove in the cross bar to 4 mm. For reducing the post system groove, please use the reducer cover strip i 98red... (combination profile) on page 5.

All posts have certification from an independent engineer's practice of positive results in structural tests. Details and foundations plans can be found on page 96.

## Berlin Basic Example of application 1

i 98601-2	2 x	post Ø 60 mm; single groove; length 2000 m
i 98601-1,5	1 x	post Ø 60 mm; single groove; length 1077 mm (shortened)
i 9830012	1 x	box profile 300 x 1200 mm incl. expansion fasteners
i 9820012	2 x	box profile 200 x 1200 mm incl. expansion fasteners
i 9860bo	2 x	bow connectors
i 98red-1,5	2 x	combination profile 1300 mm, used as cover strips (2 items à 1500 mm for self-cutting-to-size)

This is how to calculate the length of the post cross bar:

- » for post Ø 60 mm: total panel width - 125 mm = length of the post cross bar
- » for post Ø 90 mm: total panel width - 165 mm = length of the post cross bar

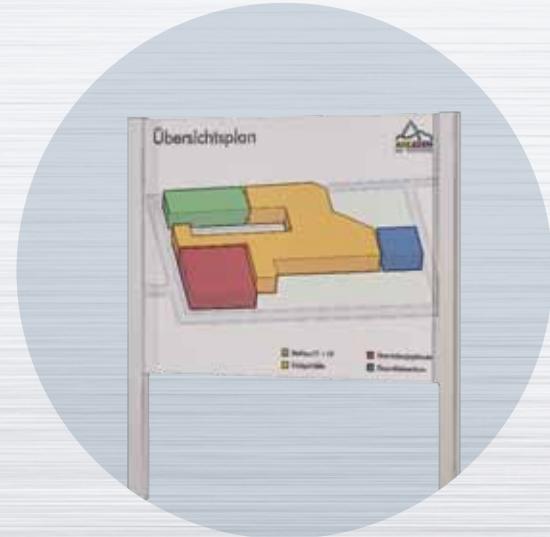

## Berlin Basic Example of application 2

i 98661-1,5	2 x	post 66 x 66 mm; single groove; length 1500 mm
i 984615	2 x	cross bar 46 x 1500 mm incl. expansion fasteners
i 984615-4	2 x	reducer profile for cross bar 1500 mm
i 98red1	2 x	combination profile 1000 mm for posts, used as cover strip
i 98red1	2 x	combination profile 500 mm for posts, used as reducers (1 item à 1000 mm for self-cutting-to-size)
i 98red1	1 x	panel 1022 x 1522 x 3 mm (on request)

This is how to calculate the panel dimensions:

Lettering area + 22 mm

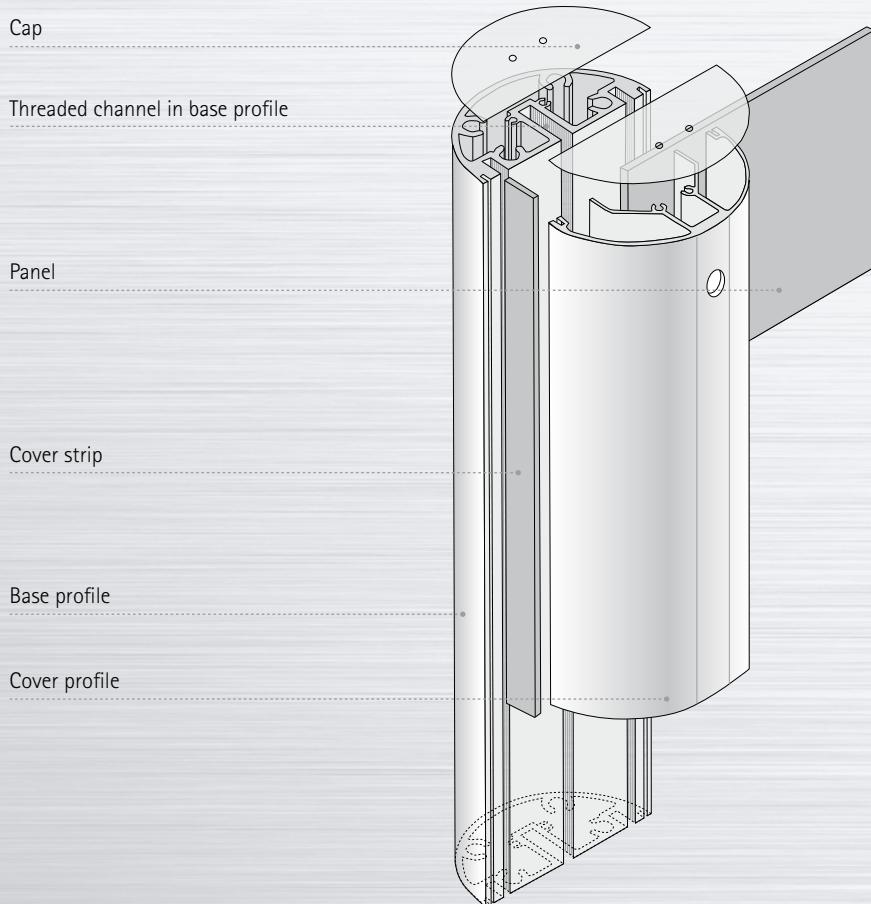

## Berlin Entrée

## Berlin Entrée

### Profiles

Berlin Entrée posts are comprised of a cover profile and a base profile, the latter being 500 mm longer to enable installation in the ground/ floor.

Delivery includes matching end caps as well as cover strips matched to the thickness of the panel. Berlin Entrée is delivered pre-assembled. Please order information panels and fastening screws separately.

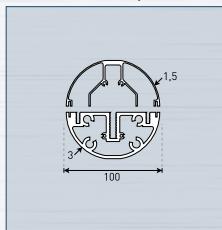

! All posts have certification from an independent engineer's practice of positive results in structural tests.

! Details and foundations plans can be found on page 96.

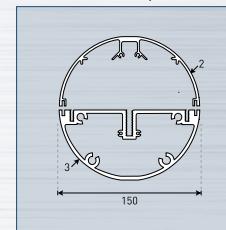

! The Berlin Entrée can only be erected by setting the 500mm longer base profile in footings. To enable the panels to be changed again in the future the cover profile must be above the footings.

### Berlin Entrée Cross-sections of the base and cover profiles

### Berlin Entrée Installation

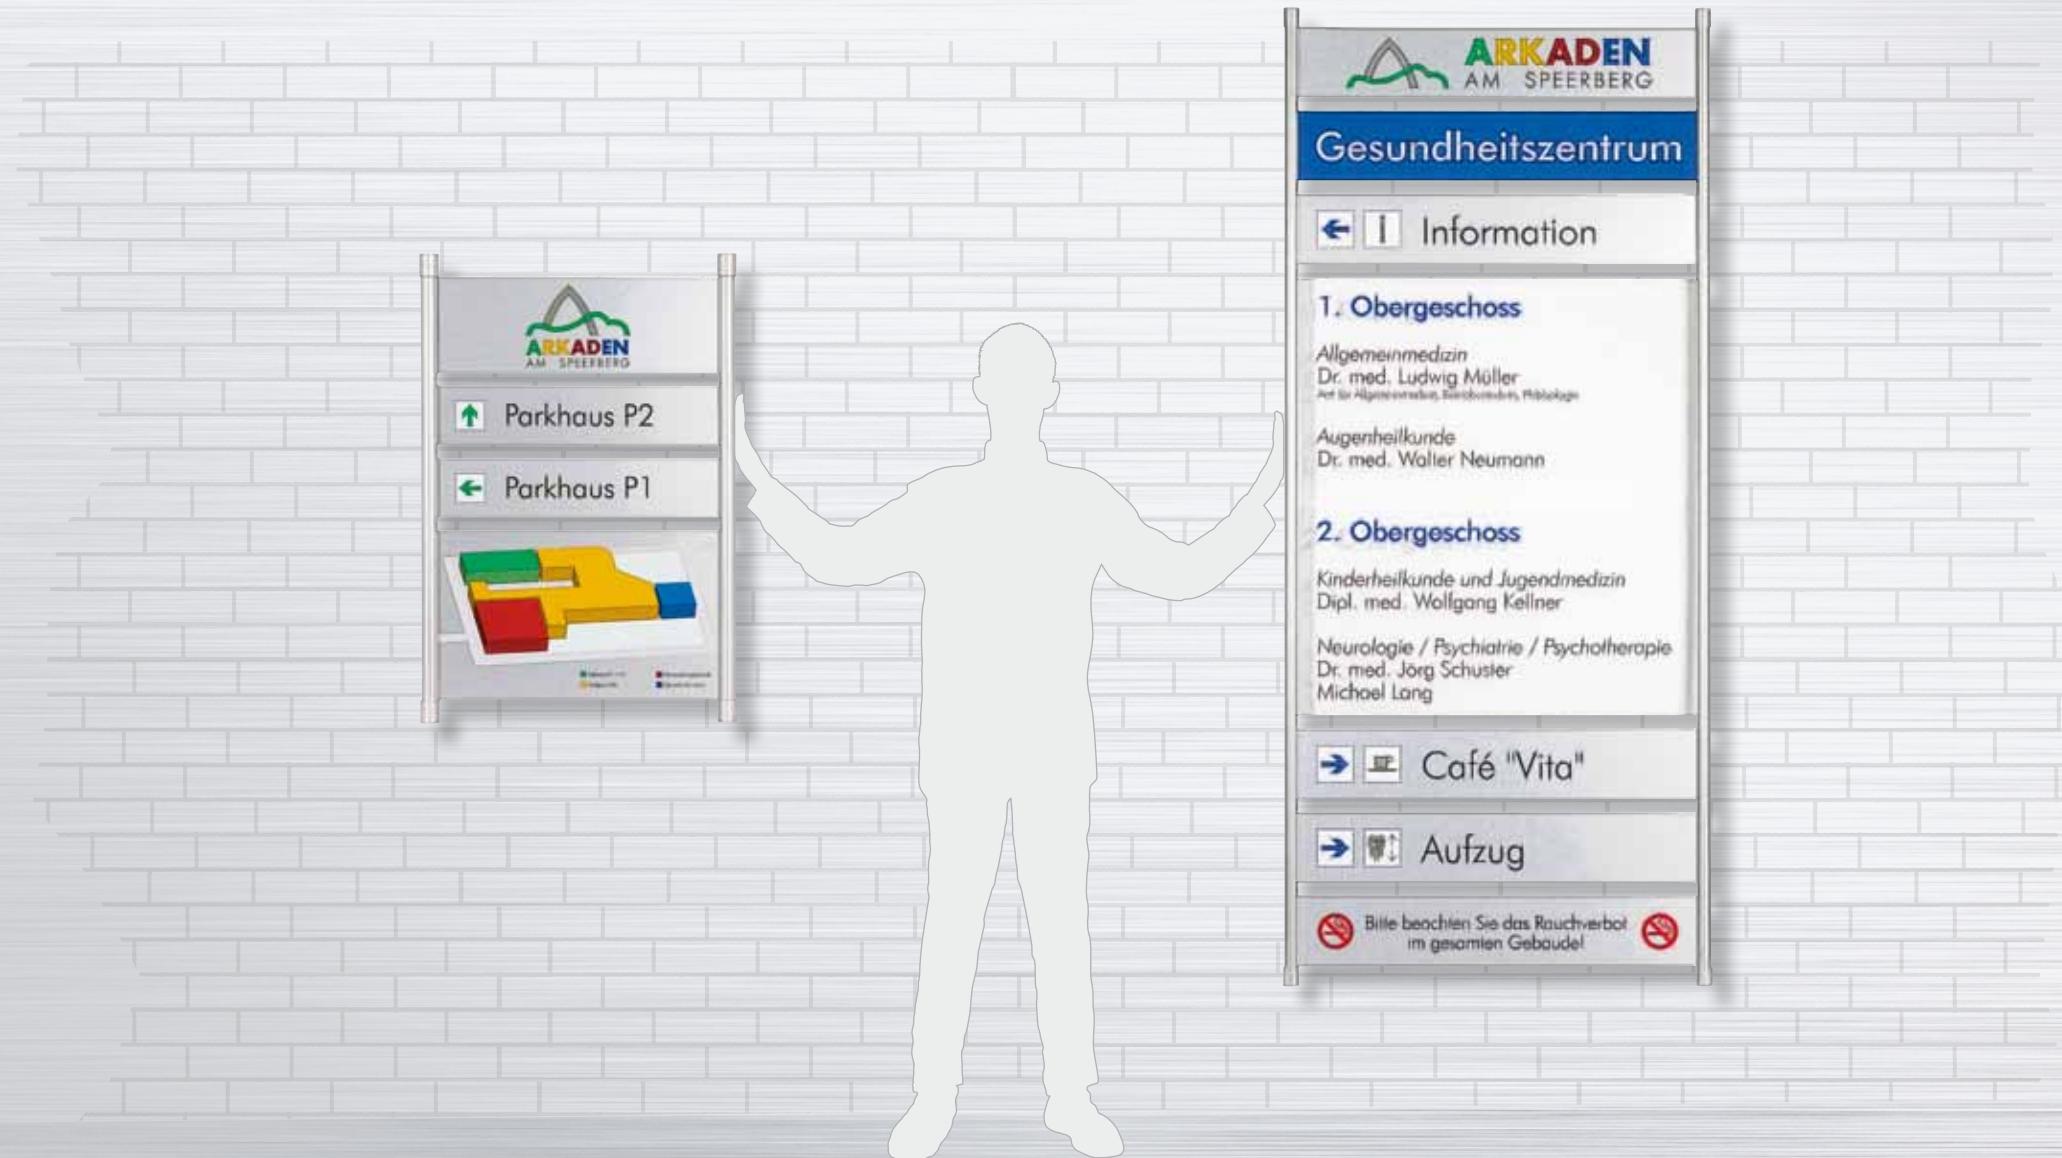

Insert the two size M8 screws through the holes in the cover profile and screw into the threaded channel on the base profile. At the same time, insert the cover strips, which vary according to the thickness of the panel, in the grooves provided.

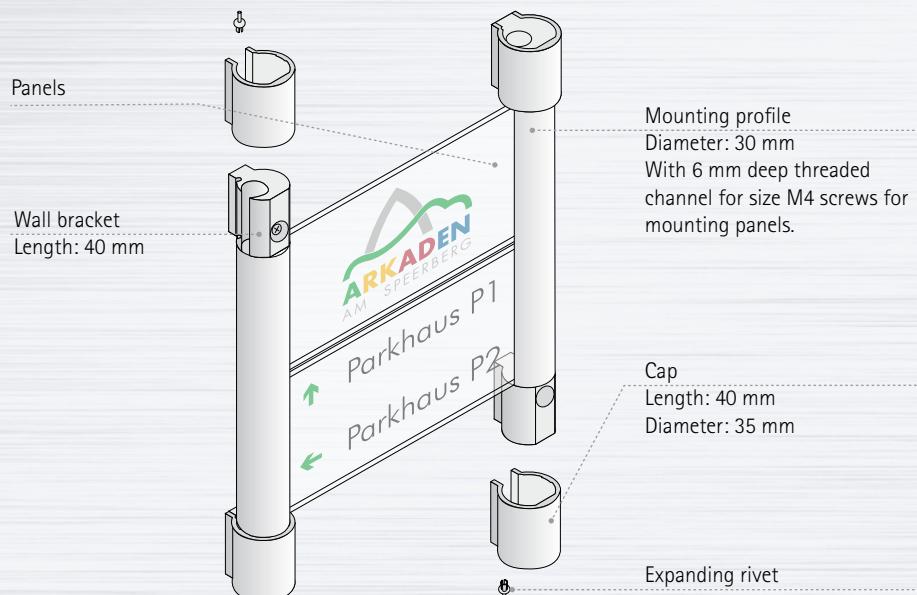

Screw the two profile end-pieces to the base and cover profiles using the supplied counter-sunk head screws.

## Berlin Sign panel system for wall mounting

## Berlin Sign panel system for wall mounting

A Berlin sign panel system is comprised of 2 mounting profiles, 4 wall brackets made of anodized aluminium, 4 caps and expanding rivets.

The information panels are fixed to the mounting profiles from the back with fillister head screws. Please order the information panel and matching fillister head screws separately.

## Fitting and changing the panels in the Berlin sign panel system

The information panels are fastened to the back of the mounting profiles with four fillister head screws each. The screws (not included in the contents of delivery) are screwed to a threaded channel in the mounting profile. This means that you can choose any size of information panel.

1. Mark the positions for the holes through the wall bracket.
2. Drill the holes and insert the dowels, then screw the wall bracket in position.
3. Fit the covers and secure with expanding rivets.

To change the panels, unscrew the allen screws in the top and bottom wall bracket on one side.

You can then swing open the mounting profile together with the signs and remove the panels.
