Information

find your way

Leit- und Orientierungssysteme vermitteln einen ersten – oft entscheidenden – Eindruck und sind wichtiger Ausdruck der Kundenfreundlichkeit. Abgestimmt auf die Architektur und die spezifischen Anforderungen des Gebäudes sind sie wesentlicher Bestandteil der Corporate Identity und spiegeln – hochwertig, durchdacht, konsequent in Form und Funktion – Selbstverständnis und Identität eines Unternehmens, einer Institution oder einer Behörde wider. Erst durch viele funktionale und gestalterische Details und hohe Qualitätsstandards wird aus einem Wegweiser oder Schild ein ausgereiftes Orientierungs- und Leitsystem. Bei der Entwicklung der Orientierungs- und Leitsysteme berücksichtigt moedel konsequent die hohen Anforderungen von Planern und Kunden. In die Entwicklung und Herstellung der unterschiedlichen Systeme fließt die über 30-jährige Erfahrung in der Produktion von Siebdruckerzeugnissen ein. 90 qualifizierte Mitarbeiterinnen und Mitarbeiter erarbeiten auf 2 Werksgeländen mit insgesamt 15.000 m² nahe Amberg nach zertifizierten Fertigungsabläufen (DIN EN ISO 9001) Produkte von höchster Präzision, Perfektion und Beständigkeit.

Information and orientation systems often provide that all-important first impression while giving vital expressions of customer-friendliness at the same time. Carefully coordinated with the architecture and the specific requirements of the building they form an essential part of corporate identity, reflecting the image and identity of the company, institution or public authority. High quality, well conceived and rigorous in both form and function. It takes great attention to functional and design details, along with high quality standards, to turn a sign or guide into an optimized information and orientation system, moedel rigorously meets the high requirements of planners and customers in the development of information and orientation systems, drawing on over 30 years of experience in the production of screen print products to develop and produce a diversity of systems. A team of 90 employees work at two factory premises (together 15.000 m²) near Amberg, where certified production processes (DIN EN ISO 9001) turn out products of the highest precision, perfection and durability.

Showcases for outdoor

Outdoor showcase Model D

The Model D outdoor showcase combines color and function. The top-mounted edging frame (available silver-anodized, painted in F1 - F16 or in a RAL color) helps make the showcase a modern and adaptable eye catcher.

Technical data:

- ▶ For wall-mounting or stand-based installation
- ▶ Usable inside depth: 35 mm
- ▶ Top-mounted edging frame, 30 mm wide
- ▶ Back panel in sheet steel (magnetic) painted in RAL 9006 white aluminium
- ▶ Side-hung casements (for landscape formats in DIN A4 and DIN A3 they open upwards)
- ▶ Glass panels: 4 mm toughened safety glass
- ▶ Two spring bolt locks for locking on the side
- ▶ Including 4 magnets

To open the side spring bolts, press in with the Allen key (included in delivery). To prevent it from being opened without authorization, screw the supplied grub screws into the threaded channel.

To release the spring bolt to open the doors, screw the locking screws in. Return to the grub screw to the original position again before for closing.

Posts for stand-based installation

For showcases which are to be installed not on the wall but elsewhere, our posts from the "Berlin Basic" system are the solution. Fitting the showcase to two box profiles (height: 100 mm) provides a simple and flexible means of installation.

The "Berlin Basic" posts are also ideal for the effortless production of large systems of showcases as well – enabling several showcases to be arranged in a line next to each other or even at 90° to each other. In addition, the ornamental attachments and curved segments are also available as well, of course.
